Assembly Checklist

Read through the instructions carefully before you begin.

Make sure you have all the required tools. Never use power tools unless instructed.

Identify and lay out all of the components before you begin assembly.

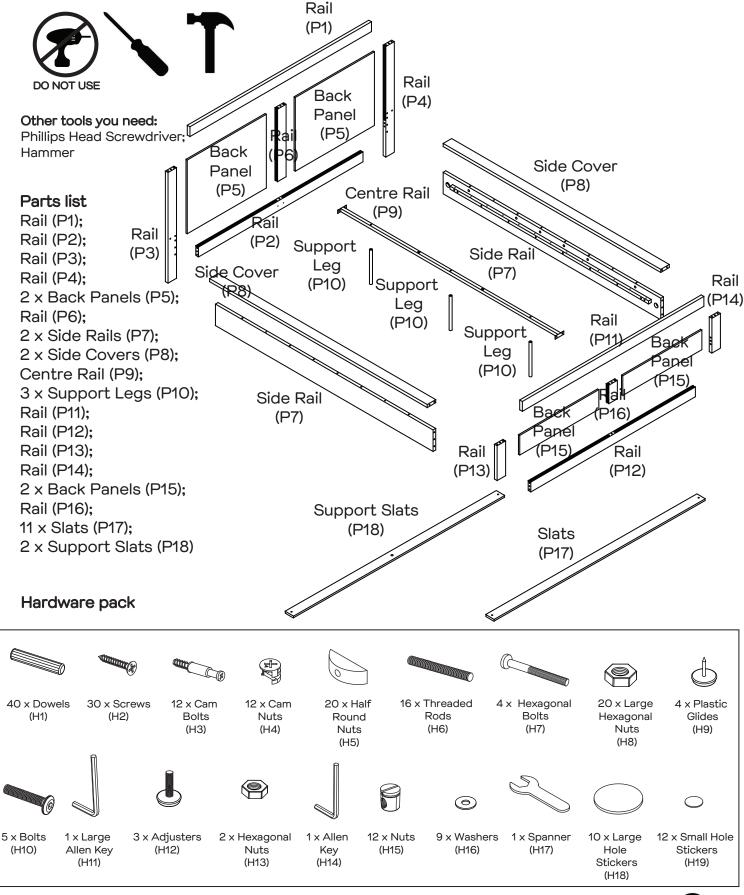

Unless instructed, do not fully tighten screws until the item is fully assembled.

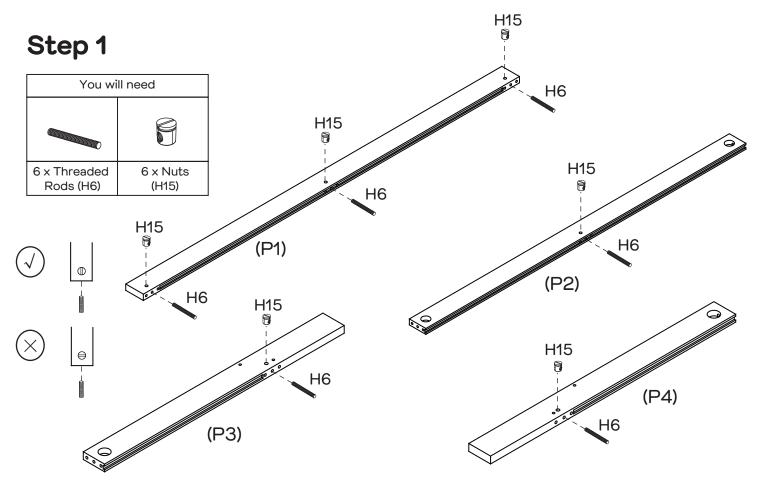

Useful Information

- ! Never use power tools unless specifically instructed. They can damage your components or hardware if used incorrectly.
- ! The most common mistakes made during assembly are using the wrong hardware or getting components back to front.
- ! Always use a soft surface (such as carpet or cardboard) when assembling your product to avoid scratching or damaging the surface of the product.
- ! Bulky items such as wardrobes and bunk beds should be assembled in the room they will be used in as they may not fit through a door once assembled.
- ! Never use any glue until you are certain that the parts belong together.
- ! Periodically check and re-tighten all fasteners. Check the product care label or website for product care instructions.
- ! If you are having any difficulties assembling your product, missing any hardware or components please visit our website Help Centre for further assistance.
- ! Please see page 2 for any safety requirements or weight restrictions.

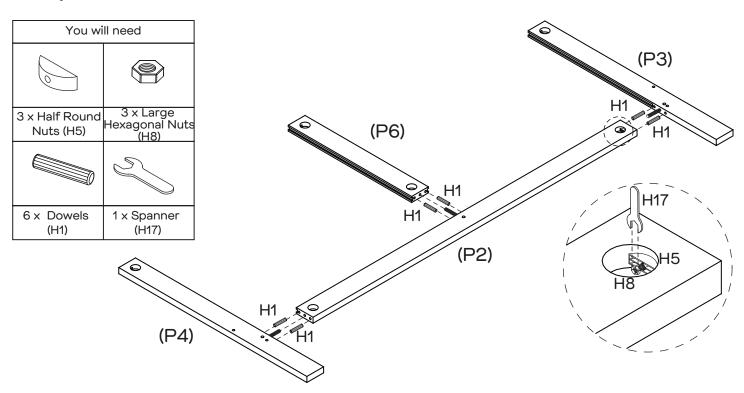

What you need

to assemble the product

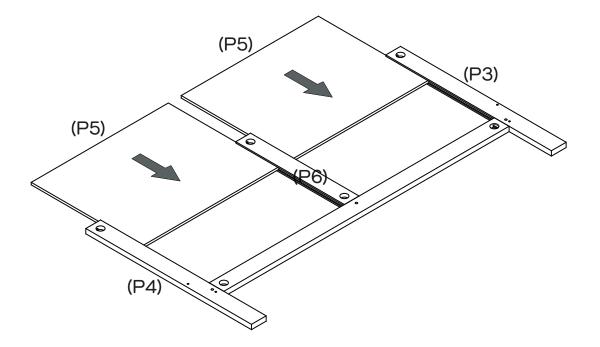

Insert 6 x nuts (H15) into the holes in rails (P1, P2, P3, P4). Ensure the lines in the nuts (H15) face incoming threaded rods as shown in the image above. Attach 6 x threaded rods (H6) to the 6×10^{-5} x nuts (H15) and hand tighten by turning clockwise.

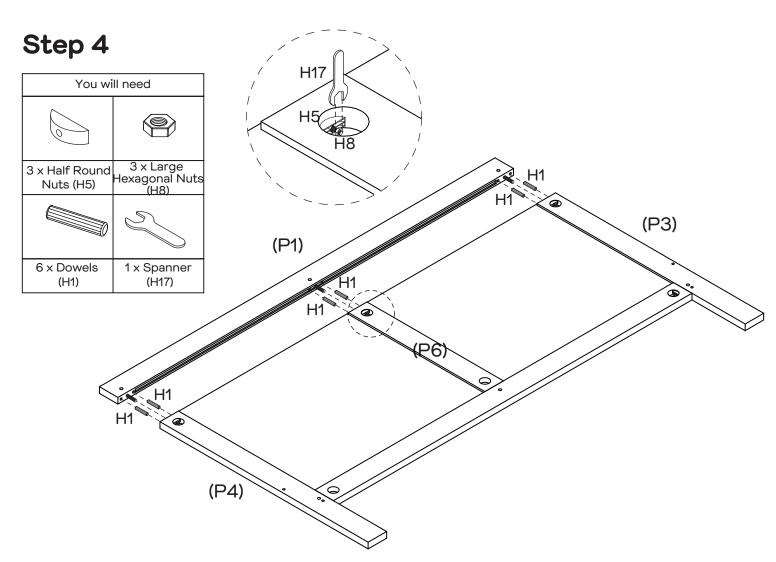

Insert 6 x dowels (H1) into rail (P2). Attach rails (P3, P4, P6) to rail (P2) and secure using 3×1 half round nuts (H5) and 3×1 half round nuts (H8), tightening with spanner (H17).

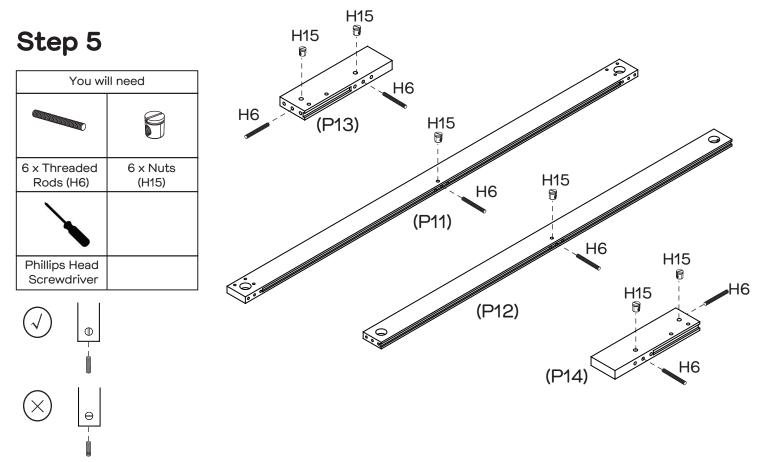

Slide 2 x back panels (P5) into the grooves of rails (P3, P4, P6).

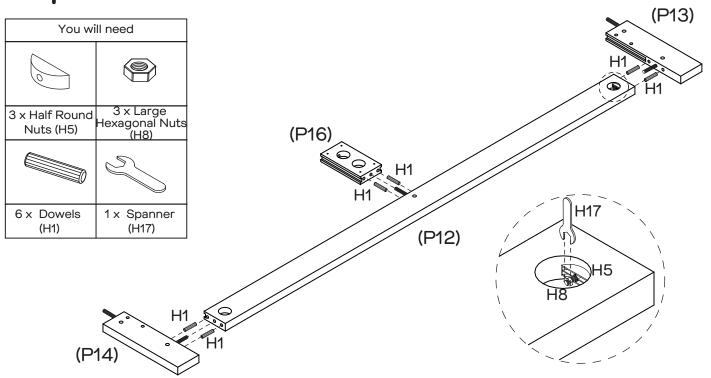

Insert 6 x dowels (H1) into rails (P3, P4, P6). Attach rail (P1) to rails (P3, P4, P6) and secure using 3 x half round nuts (H5) and 3 x large hexagonal nuts (H8), tightening with spanner (H17).

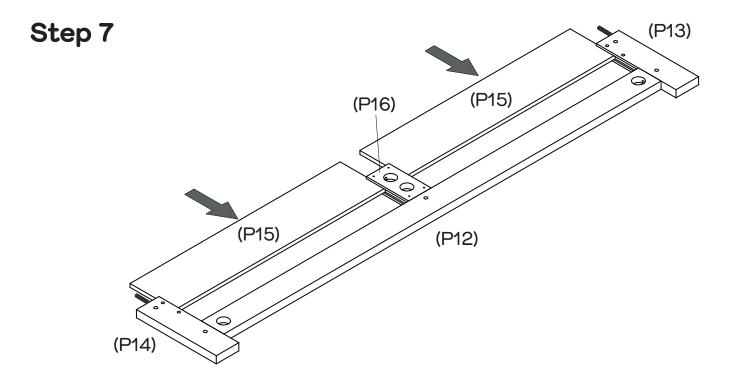

Insert 6 x nuts (H15) into holes on rails (P11, P12, P13, P14). Ensure the lines on the nuts (H15) face incoming threaded rods as shown in the image above. Attach 6 x threaded rods (H6) into the 6×10^{-5} x nuts (H15) and hand tighten by turning clockwise.

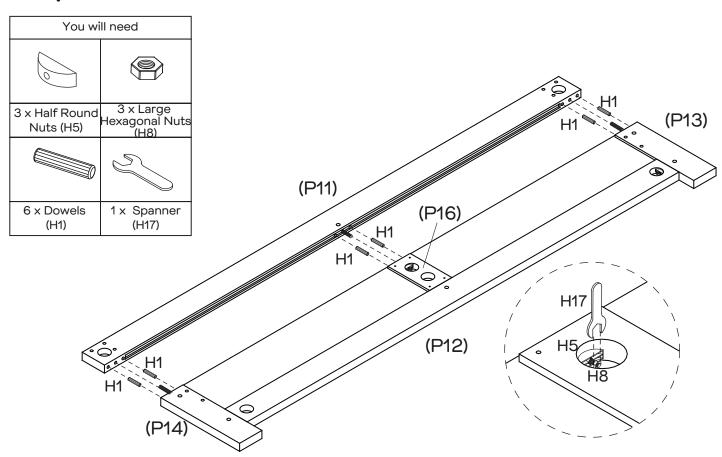

Insert 6 x dowels (H1) into rail (P12). Attach rails (P13, P14, P16) to rail (P12) and secure using 3×1 half round nuts (H5) and 3×1 half round nuts (H5), tightening with spanner (H17).

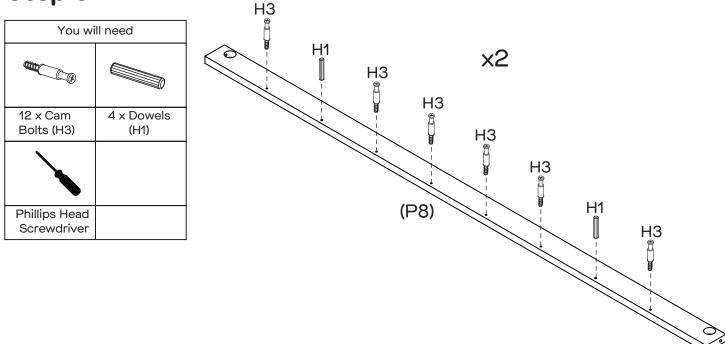

Slide 2 x back panels (P15) into the grooves of rails (P13, P14, P16).

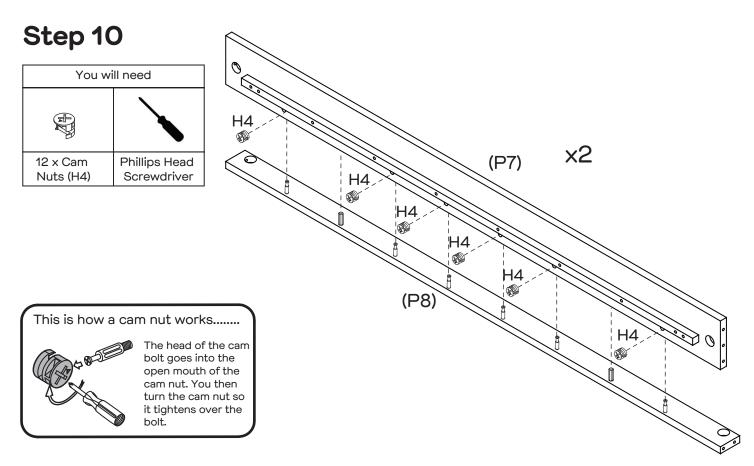

Insert 6 x dowels (H1) into rails (P13, P14, P16). Attach rail (P11) to rails (P13, P14, P16) and secure using 3 x half round nuts (H5) and 3 x large hexagonal nuts (H8), tightening with spanner (H17).

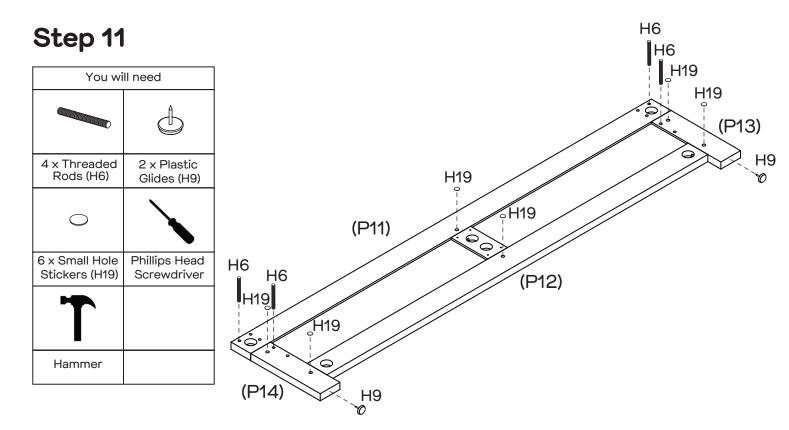

Attach 6 x cam bolts (H3) into 1 x side cover (P8), tightening with a phillips head screwdriver. Insert 2×4 dowels (H1) into the side cover (P8).

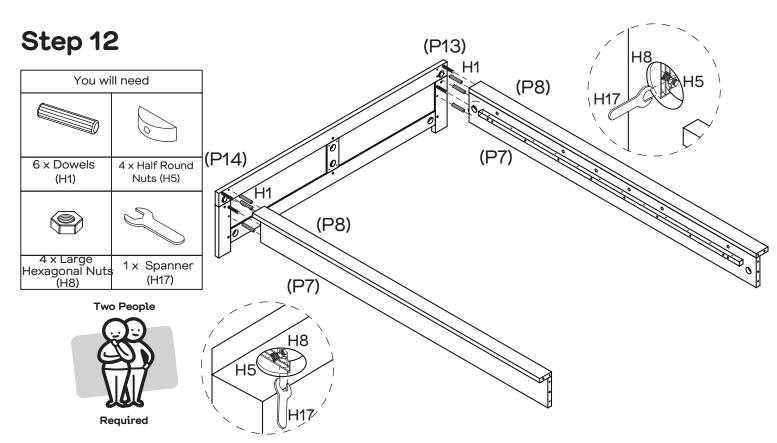

Insert 6 x cam nuts (H4) into the holes on the side rail (P7). Rotate the cam nuts so the arrows point towards the incoming cam bolts. Attach the side rail (P7) to the side cover (P8), then tighten the cam nuts with a phillips head screwdriver. Repeat step 9 and step 10 for the other side cover (P8) and side rail (P7).

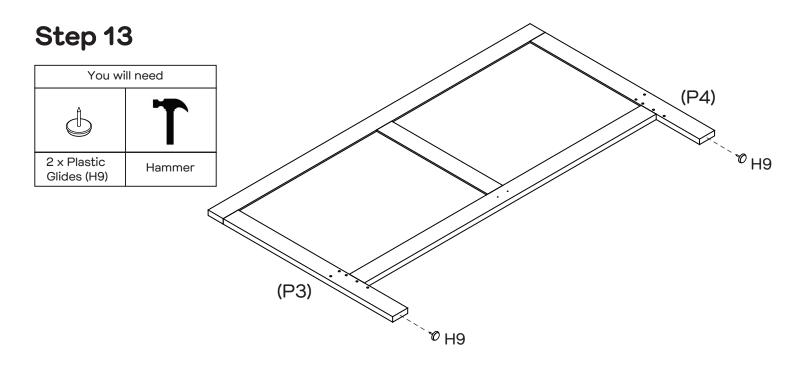

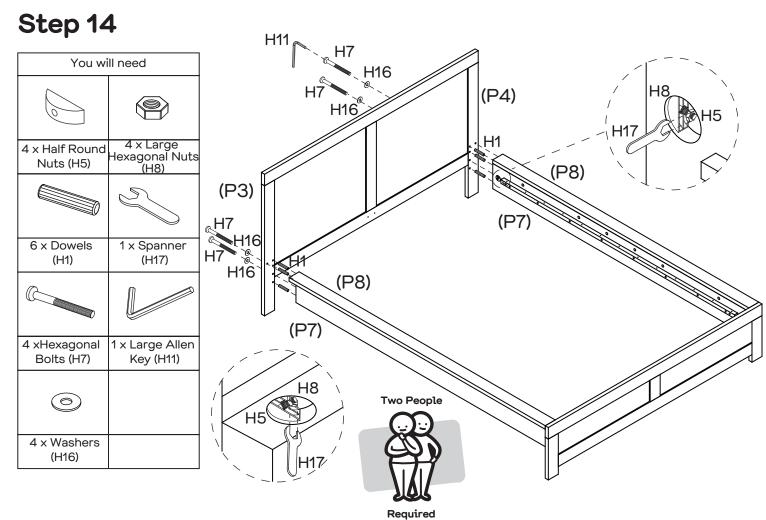

Attach 4 x threaded rods (H6) into rails (P13, P14). Attach 2 x plastic glides (H9) to the end of rails (P13, P14) by gently tapping with a hammer. Attach 6 x small hole stickers (H19) to the holes of rails (P11, P12, P13, P14).

Insert 6 x dowels (H1) into 2 x side covers (P8) and 2 x side rails (P7). Attach rails (P13, P14) to 2 x side covers (P8) and 2 x side rails (P7) and secure using 4 x large hexagonal nuts (H8) and 4×10^{-2} half round nuts (H5), tightening with the spanner (H17).

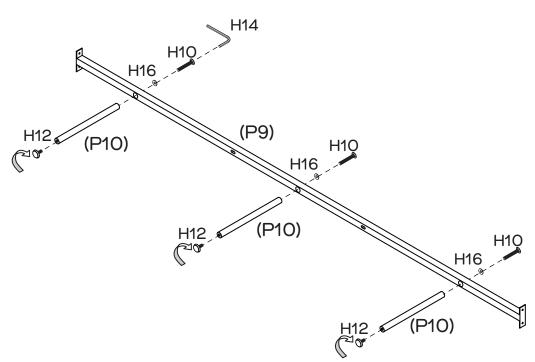

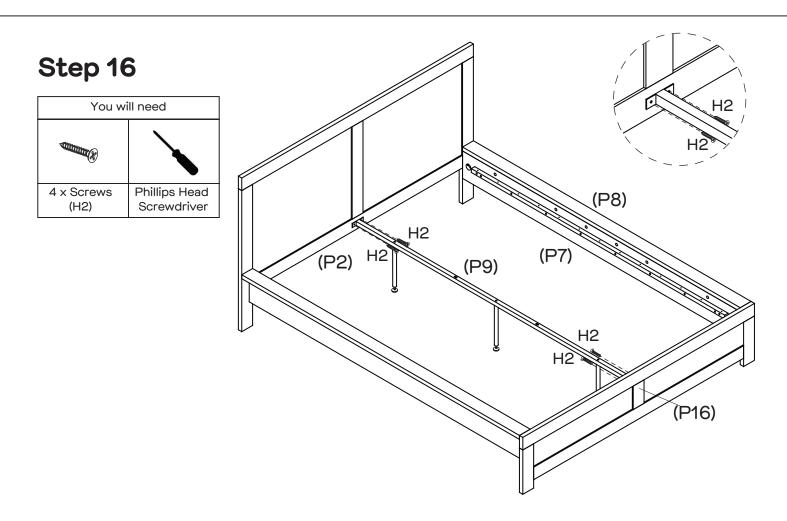

Attach 2 x plastic glides (H9) to end of rails (P3, P4) by gently tapping with a hammer.

Insert 6 x dowels (H1) into 2 x side covers (P8) and 2 x side rails (P7). Thread 4 x hexagonal bolts (H7) through the 4 x washers (H16) and push the 4 x hexagonal bolts (H7) through rails (P3, P4). Attach rails (P3, P4) to 2 x side covers (P8) and 2 x side rails (P7), secure using 4 x large hexagonal nuts (H8) and 4 x half round nuts (H5) with spanner (H17). Tighten 4 x hexagonal bolts (H7) with large allen key (H11).

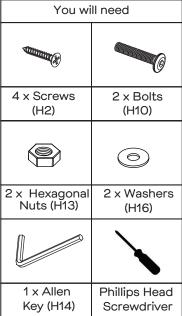

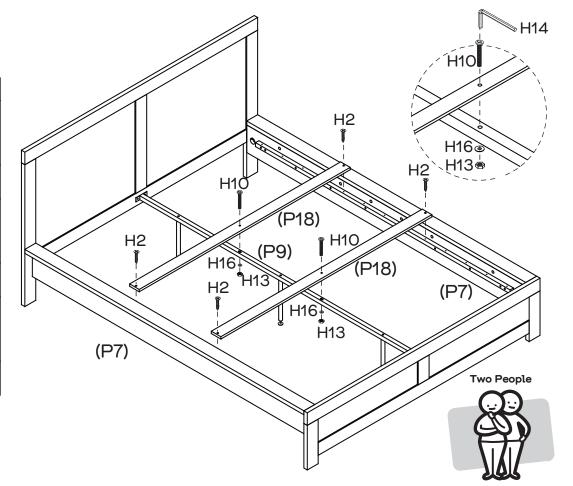

Attach the centre rail (P9) to the rails (P2, P16) using 4 x screws (H2). Tighten with a phillips head screwdriver.

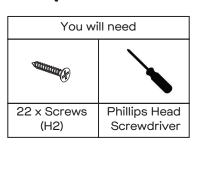

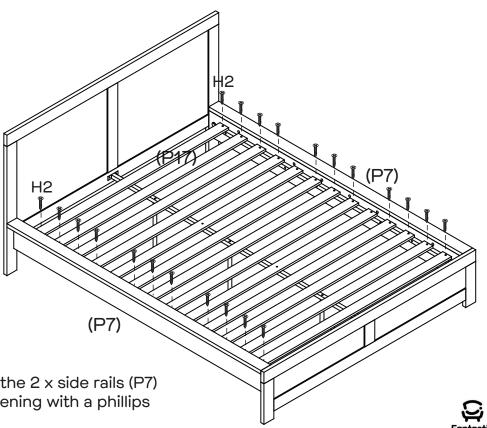

Attach the 2 x support slats (P18) to the centre rail (P9) using

2 x bolts (H10), 2 x washers (H16) and 2 x hexagonal nuts (H13), tightening with the allen key (H14).

Attach the 2 x support slats (P18) to the 2 x side rails (P7) using 4 x screws (H2), tightening with a phillips head screwdriver. Ensure the adjusters (H12) on the support legs (P10) are retracted so they are not touching the floor. With assistance, move the bed into its final position. Once the bed is in it's final position extend the 3 x adjusters (H12) on the 3 x support legs (P10) so they are level with the floor.

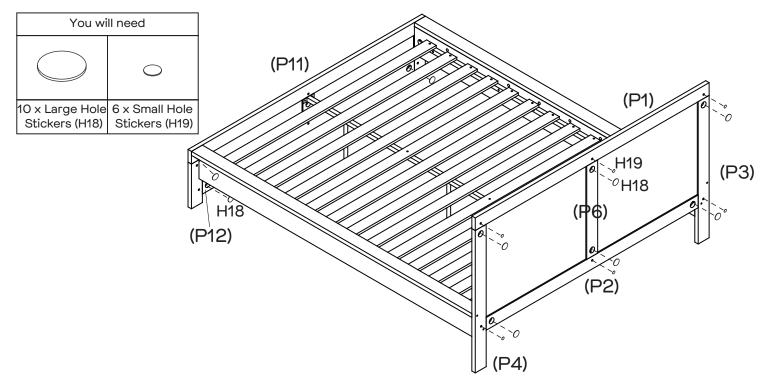

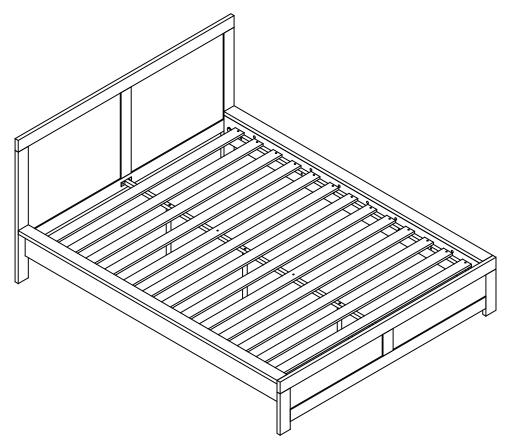

Attach the 11 \times slats (P17) to the 2 \times side rails (P7) using 22 \times screws (H2), tightening with a phillips head screwdriver.

fantasticfurniture.com.au

Cover the holes on rails (P2, P3, P4, P6, P11, P12) using 10 x large hole stickers (H18). Cover the holes on rails (P1, P2, P3, P4) using 6 x small hole stickers (H19).

Job Complete!

In the interest of our environment please dispose of all packaging thoughtfully.
