HELPFUL BUNK BED SAFETY TIPS

Bunk beds should be checked periodically to ensure that the guardrail, ladder and other components are secure and in the correct position and all connectors are tight.

We recommend that children under the age of nine (9) do not use the upper bunk. Children should be discouraged from playing on the bunk bed.

No more than one occupant should use the upper bunk at any time (unless otherwise stated).

Bunk beds should be placed a minimum of 2 metres away from any ceiling fans to prevent any injury to the upper bunk occupant.

Assembly Checklist

Read through the instructions carefully before you begin.

Make sure you have all the required tools. Never use power tools unless instructed.

Identify and lay out all of the components before you begin assembly.

Unless instructed, do not fully tighten screws until the item is fully assembled.

Useful Information

Never use power tools unless specifically instructed. They can damage your components or hardware if used incorrectly.

The most common mistake made during assembly are using the wrong hardware or getting components back to front.

Always use a soft surface (such as carpet or cardboard) when assembling your product to avoid scratching or damaging the surface of the product.

Bulky items such as wardrobes and bunk beds should be assembled in the room they will be used as they may not fit through a door once assembled.

Never use any glue until you are certain that the parts belong together.

Periodically check and re-tighten all fasteners. Check the product care label or website for product care instructions.

If you are having any difficulties assembling your product, missing any hardware or components please visit our website Help Centre for further assistance.

Please see page 2 for any safety requirements or weight restrictions.
